IEMA Webinar: What Does Professional Ethics Mean in Sustainability?

In a world where breaches of professional ethics keep hitting the headlines, we're asking has this changed what people expect of professionals? IEMA's month of focus on professional conduct and ethics at work continues in this webinar.

We'll examine why ethical business practices are so important, particularly for environment and sustainability professionals, and how the practices and codes that underpin the concept can be a real enabler on the journey to sustainability.

A Professional's Perspective:

Mike Lachowicz

An update from IEMA

An updated Code

Demonstrate and advocate **high standards** of professional practice.

THIS MEANS I WILL:

- Comply with all legal requirements as they apply to me, going beyond compliance where standards of professional practice dictate.
- Advise and influence organisations and individuals, helping them comply with all legal requirements and supporting them to adopt good practice.
- Challenge unlawful or unprofessional behaviour, taking action as necessary.
- Fulfil responsibilities to employers and clients in a timely, cost-effective and accurate manner.
- Safeguard confidential, sensitive and personal information, not seeking personal gain from such information.
- Ensure others I assign or contract work to are skilled and competent to deliver.
- Respect scientific methods and use science-based targets and evidence whenever practical.

Apply my skills and experience to **protect & enhance** the environment, **improve** quality of life, and contribute to **sustainability**.

THIS MEANS I WILL:

- Recognise the specific needs of stakeholders, including the environment and society, and my responsibilities to them. I will make decisions and take action that avoids harm, and has a positive impact on the environment and society.
- Communicate environmental or social concerns with regard to action or in-action when giving advice.
- Inspire and support others to act sustainably and to adopt sustainable and resilient business practices.
