Senior Consultant

Ramboll Environ

Webinar slides and recording

IEMA records all webinars and publishes them alongside the slides at <http://www.iema.net/event-reports>

Challenges of SIA in International Development

Social Impact Assessment (SIA) is the processes of analysing, monitoring and managing the social consequences of development projects. This webinar will take you through practical examples from the oil and gas and mining sector developments located in Russia and Southern Africa to explore social impact challenges that an SIA practitioner must overcome to deliver an effective assessment.
