

Community-led regeneration of V&DL

Practical experience supporting community led regeneration & wide member network

Expertise in policy & best practise development for our land

Project aims:

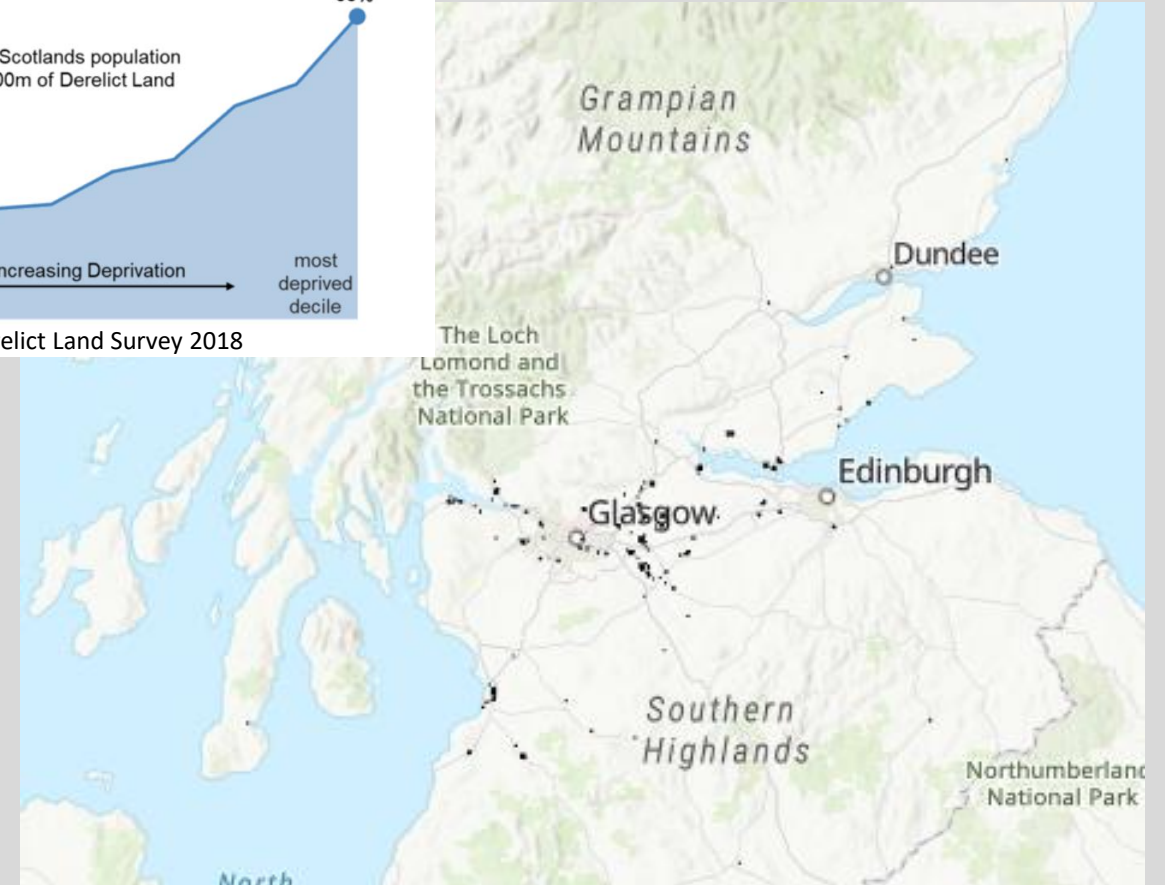

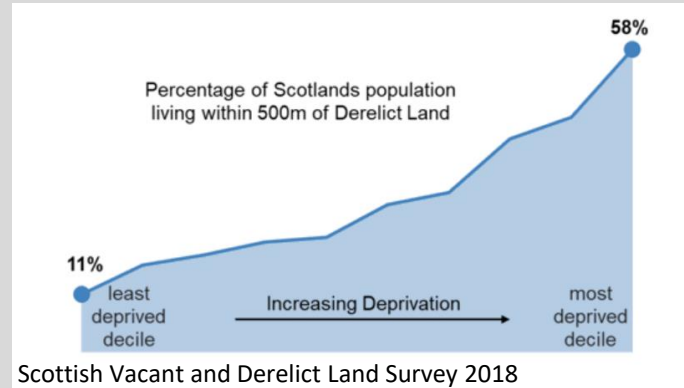

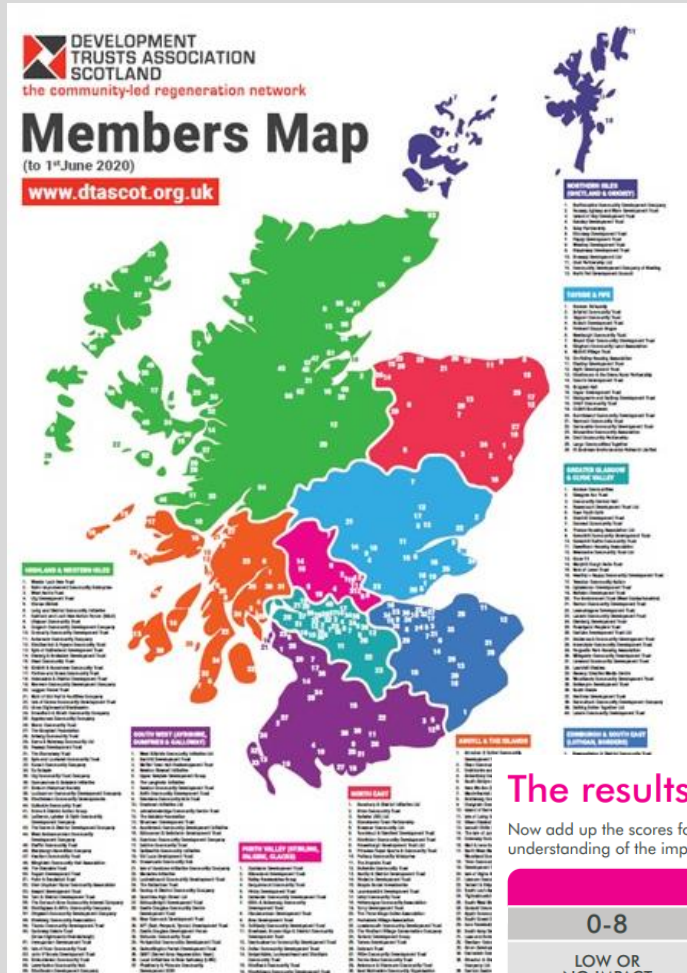

1. To stimulate community-led activity on V&DL
1. To learn about models of community-led regeneration

The results

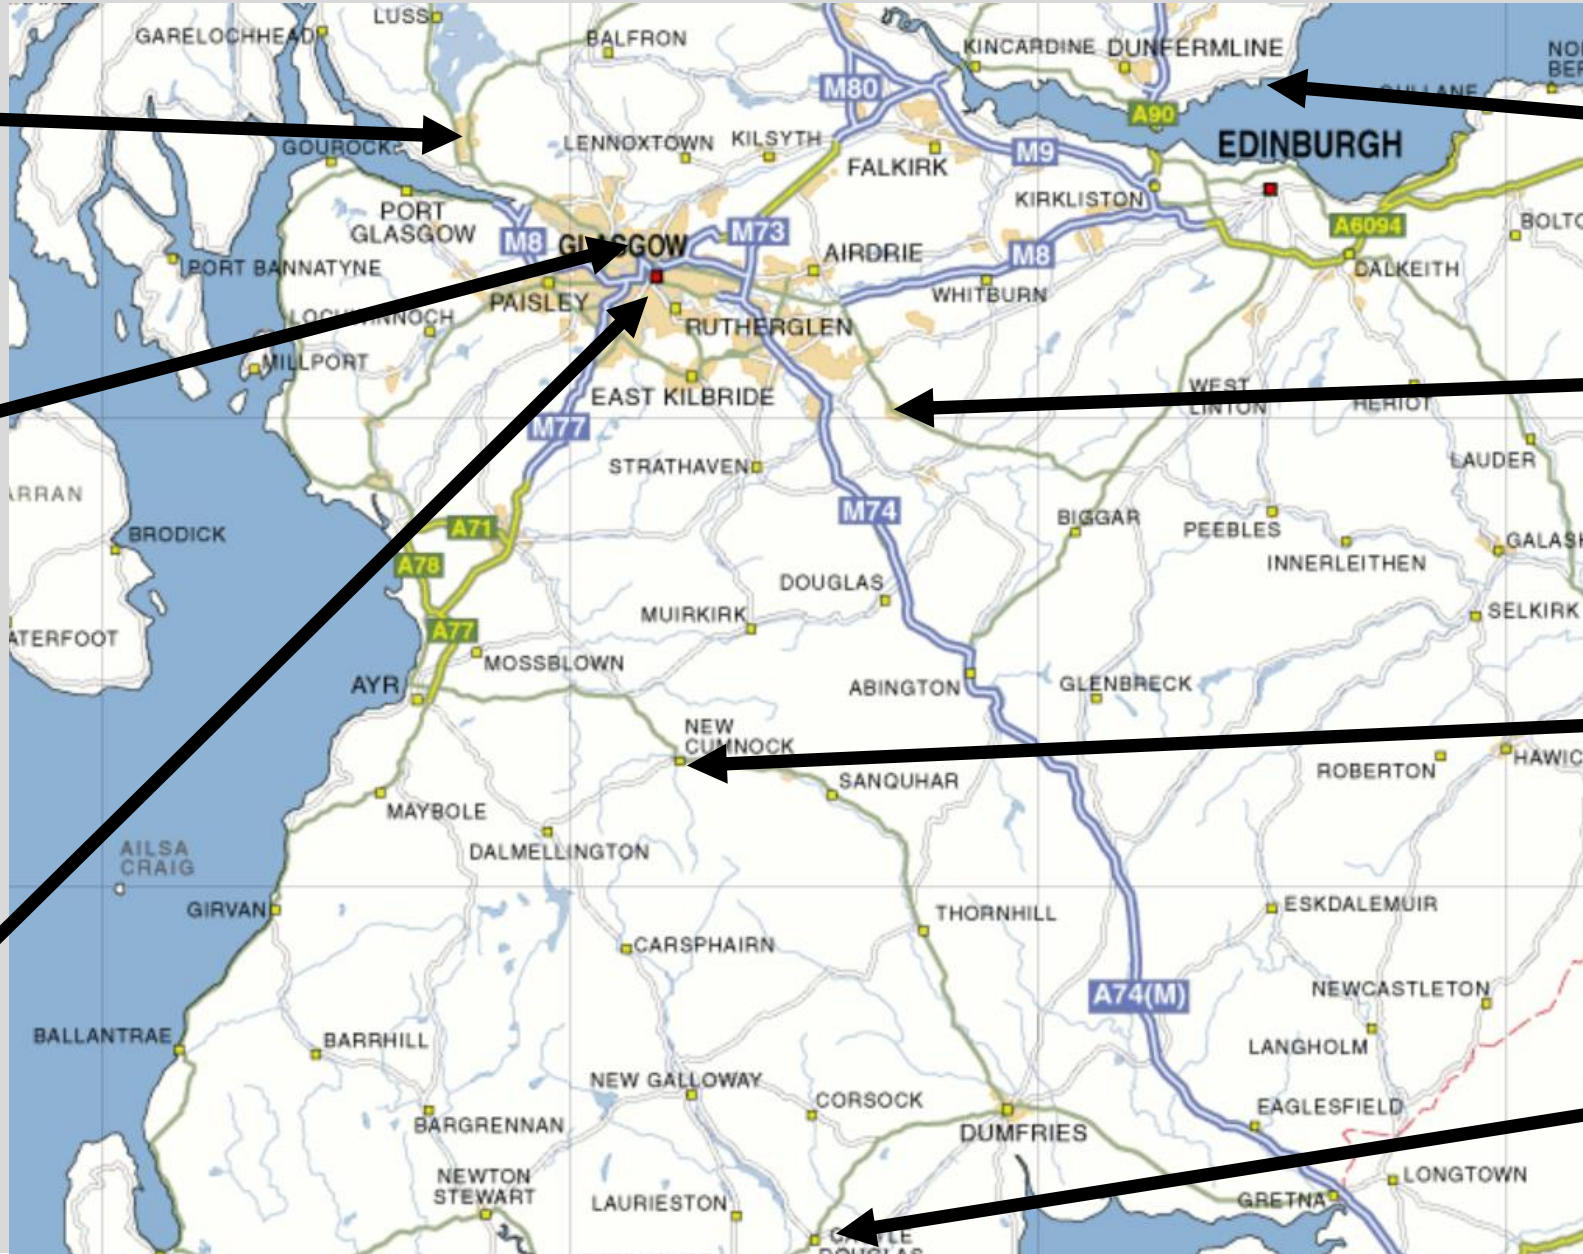

Now add up the scores for each question to get an understanding of the impact of the site on the community.

TOTAL SCORE		
0-8	9-16	17-24
LOW OR NO IMPACT	MODERATE – STRONG IMPACT	HIGH – VERY HIGH IMPACT
The site has some or no impact on place and community perception or feelings.	The site has negative impacts on some but not in all areas.	This site has multiple negative impacts on the community. The condition of the site significantly affects access, health, wellbeing and how people feel or behave.
