Upcoming webinars

- 17th August - Focus on Sustainable Finance: How will EU ESG Disclosure and Taxonomy Regulations affect IEMA members? What you need to do now
- 18th August - Circular Economy in Practice: Designing out waste - How to embed CE principles at the outset of building construction projects
- 20th August - IEMA Book Club – Our Common Future
- 24th August - Impact of Social Value: British Standard 8950: Recommendations on how sustainability professionals can enhance social value
- 25th August - Considering Greenhouse Gas Emissions in EIA

Background

- Progress towards a circular economy requires large numbers of organisations to engage in the transition to sustainable resource management.
- During this session members will therefore gain an introduction to the concept of the circular economy, as well as practical guidance based on industry experiences to support members in making key first steps towards a transition to sustainable resource management within their organisations.

Session focus

- Learn about the key principles and concepts connected to the circular economy;
- Have access to focused case studies within the waste management sector of the benefits and challenges of the circular business model;
- Gain an overview of available tools to support you in your work.
